

Frat Finance Tracker UI / UX Walkthrough

Here's a quick walkthrough of the current UI.
Let me know what changes you want to see

VP Dashboard (Landing Screen)

This is the main screen you land on as VP.

The idea is that you can tell:

- How much the chapter owes in total
- How much has already been collected
- How much is still outstanding

Below that is a simple list of brothers so you can quickly see who's paid and who hasn't without digging.

Questions:

- Does this give you the info you care about fast enough?
- Anything missing that you'd expect to see right away?

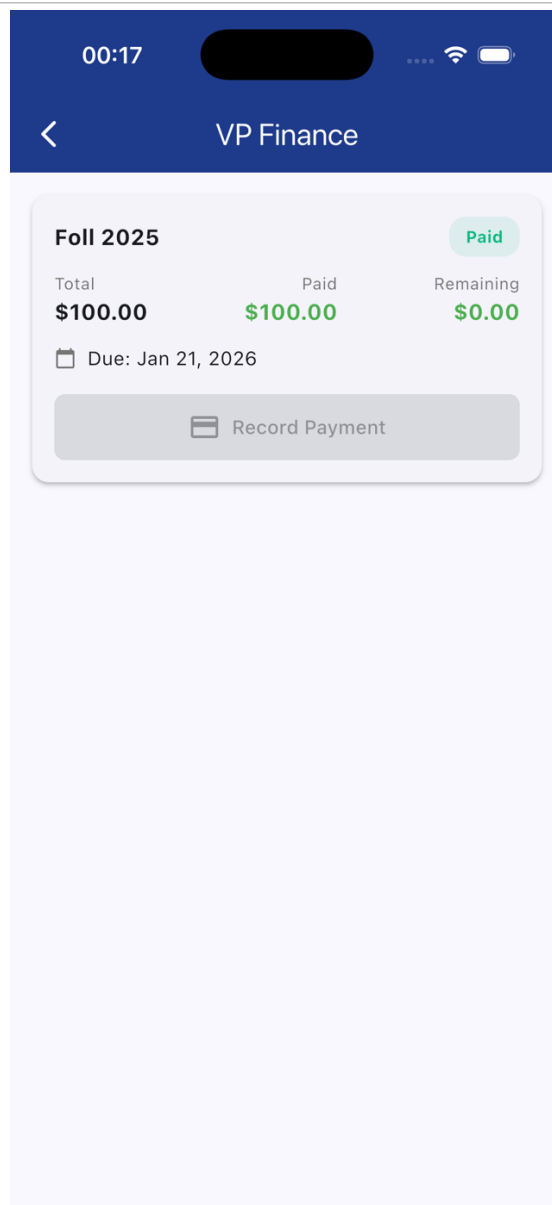

Brother Detail Paid Example

This is the detailed view for an individual brother when their dues are fully paid. The “Paid” status is intentionally very obvious so there’s no ambiguity.

This is mainly for confirmation and record-keeping.

Questions:

- Is it clear enough that this person is completely done?
- Would you want any extra info here or is this sufficient?

The screenshot shows a mobile application interface for 'VP Finance'. At the top, there's a status bar with the time '00:17', a black pill-shaped notch, and icons for cellular signal, Wi-Fi, and battery. Below the status bar is a dark blue header with a back arrow on the left and the text 'VP Finance' on the right. The main content area is light purple and contains a white rounded rectangle. Inside this rectangle, the title 'Foll 2025' is on the left, and a green pill-shaped button with the text 'Paid' is on the right. Below the title, there's a table with three columns: 'Total', 'Paid', and 'Remaining'. The 'Total' row shows '\$100.00' in bold black text. The 'Paid' row shows '\$100.00' in bold green text. The 'Remaining' row shows '\$0.00' in bold green text. Below the table, there's a calendar icon followed by the text 'Due: Jan 21, 2026'. At the bottom of the white rounded rectangle is a grey button with a wallet icon and the text 'Record Payment'.

Total	Paid	Remaining
\$100.00	\$100.00	\$0.00

Due: Jan 21, 2026

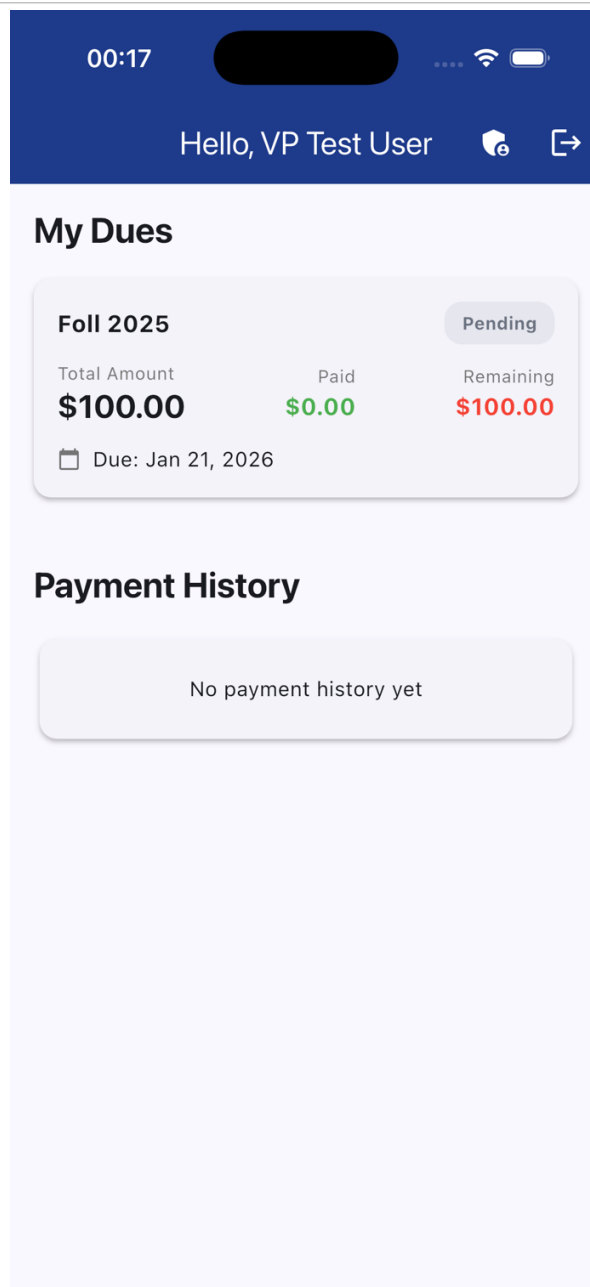

Record Payment

Brother Detail Pending / Unpaid Example

Same screen as above, but showing an unpaid or partially paid state.
The goal is to make it immediately clear how much is still owed and by when.

Questions:

- Is the unpaid state obvious enough?
- Would you want any extra visual emphasis or reminders here?

Record Payment

This is the modal for logging a payment.

Only **amount** and **date** are required — everything else is optional to keep this fast during meetings.

The goal is that you can record payments quickly without slowing things down. Currently defaults to total dues amount and the current date.

Questions:

- Does this feel fast enough?
- Anything you'd want pre-filled or automated?

The screenshot shows a mobile app interface with a dark blue header bar. The status bar at the top displays the time 00:17, signal strength, Wi-Fi, and battery. The header bar contains a back arrow and the text 'VP Test User'. Below the header, a card titled 'Foll 2025' with a 'Pending' status is visible. A white modal is open in the center, titled 'Record Payment for VP Test User'. The modal contains the following fields: 'Foll 2025', 'Payment Amount' (with a value of '\$100.00'), 'Payment Date' (with a value of 'Dec 22, 2025' and a calendar icon), 'Payment Method (Optional)', and 'Notes (Optional)'. At the bottom of the modal are two buttons: 'Cancel' and 'Record Payment'.

Create Dues Period

This is where you create a new semester or dues cycle.
Everything is intentionally in one place:

- Name of the dues period
- Total amount
- Due date
- Who it applies to

Trying to make this hard to mess up.

Questions:

- Does this feel straightforward?
- Is anything confusing or unnecessary?

The image is a screenshot of a mobile application interface. At the top, a dark blue header bar contains the time '00:17', a signal strength indicator, and a battery level indicator. Below the header, the text 'VP of Finance Dashboard' is visible next to a user profile icon and a menu icon. The main content area is a light gray background with a modal form titled 'Create Dues Period' in the center. The modal form has a white background and rounded corners. It contains four input fields: 'Dues Period Name', 'Total Amount', 'Due Date' (with a calendar icon and the date 'Jan 21, 2026'), and 'Notes (Optional)'. Below these fields is a checkbox labeled 'Assign to all brothers' which is checked. At the bottom of the modal are two buttons: 'Cancel' and 'Create'. In the bottom right corner of the app screen, there is a dark blue button with a plus icon and the text '+ Create Dues'.

+ Create Dues

Assign Dues (Everyone vs Select Brothers)

Here you decide whether dues apply to everyone or just specific brothers. This is mainly about preventing accidental assignments.

Questions:

- Does this give you enough control?
- Would you want a faster default for common cases?

A mobile app interface showing a 'Create Dues Period' modal. The modal is a light purple box with rounded corners, centered on a dark blue background. It contains several input fields: 'Dues Period Name', 'Total Amount', 'Due Date' (with a calendar icon showing 'Jan 21, 2026'), and 'Notes (Optional)'. Below these fields is a checkbox labeled 'Assign to all brothers'. Underneath the checkbox is a list of two users: 'VP Finance' (vpfinance@test.com) and 'VP Test User' (vp@test.com), each with an unchecked checkbox to its right. At the bottom of the modal are two buttons: 'Cancel' and 'Create'.

Overall Feedback

- Does the flow match how you'd actually use this as VP?
- Anything confusing, annoying, or missing?
- Any actions you wish were one tap instead of two?

Current state of the project:

For Brothers (Regular Users)

1. Personal Dashboard

- View all assigned dues with status badges (Pending, Partial, Paid, Overdue)
- See total amount, amount paid, and remaining balance for each dues period
- View complete payment history across all dues periods
- Pull-to-refresh to update data
- Due dates clearly displayed with calendar icons

2. Authentication

- Secure login with email and password
- First-time users must change default password immediately
- Automatic logout functionality

For VP of Finance (Admin)

1. Admin Dashboard

- Overall statistics card showing:
 - Total amount owed across all brothers
 - Total collected
 - Total outstanding
- Brother cards showing individual payment status
- Quick view of each brother's total dues, paid amounts, and remaining balance
- Click any brother to see detailed breakdown

2. Dues Management

- Create Dues Periods with:
 - Custom name (e.g., "Fall 2024 Dues")
 - Dollar amount
 - Due date
 - Optional notes
- Assign to all brothers or select specific brothers
- Includes VP in brother selection (since VP is also a brother)

3. Payment Recording

- Manually record payments for any brother with:
 - Payment amount (with validation)

- Payment date (cannot be future or more than 2 years past)
- Payment method (optional - e.g., Venmo, Cash, Zelle)
- Notes (optional)
- Automatic calculation to prevent overpayments
- Payment Plans Support: Brothers can make multiple partial payments
- Real-time updates after recording payment
- Audit trail: Every payment records who entered it and when

4. User Management

- Create new users (brothers or other VPs) with:
 - Email address
 - Full name
 - Role selection (Brother or VP of Finance)
 - Default password: "password123"
 - Automatic forced password change on first login
- Users cannot access the app until they change their password

5. Dual View Toggle

- VP can switch between:
 - Admin Dashboard (manage all brothers)
 - Personal Dashboard (view own dues as a brother)
- Icons in app bar for easy navigation

Security & Data Protection

1. Input Validation

- Amount limits: \$0.01 - \$100,000
- Date restrictions prevent backdating abuse
- Text field length limits
- XSS prevention (removes HTML characters from inputs)
- Overpayment prevention with 1-cent tolerance for rounding

2. Database Security

- Row Level Security (RLS) policies:
 - Brothers can only see their own dues and payments
 - VP can see and manage all data
- Audit trails on all records (created_by, recorded_by)
- Authenticated users only (no anonymous access)

3. Error Handling

- User-friendly error messages (no technical jargon)
- All database operations wrapped in try-catch
- Network failure handling with pull-to-refresh
- 5-second display duration for important errors
